Getting Started

Install Ionic

Install Ionic Framework on your computer by following the instructions on the official web (<https://ionicframework.com/docs/installation/cli>). If you already have installed a valid v5 ionic version, you can skip this step.

The screenshot shows the Ionic Framework documentation page for installing the CLI. The page has a sidebar with a navigation menu. The main content area is titled 'Installing Ionic' and contains the following text:

Ionic apps are created and developed primarily through the Ionic **command-line** utility. The Ionic CLI is the preferred method of installation, as it offers a wide range of dev tools and help options along the way. It is also the main tool through which to run the app and connect it to other services, such as Ionic Appflow.

Install the Ionic CLI

Before proceeding, make sure the latest version of **Node.js** and **npm** are installed. See **Environment Setup** for details. Install the Ionic CLI globally with npm:

```
$ npm install -g ionic
```

Copy the theme code on your computer

After downloading the zip file, copy the content of src folder into your computer. You will see the following files and folders:

e2e	31/10/2020 21:25	Carpeta de archivos	
src	31/10/2020 21:25	Carpeta de archivos	
.gitignore	15/10/2020 19:01	Documento de te...	1 KB
angular.json	15/10/2020 19:01	Archivo de origen ...	6 KB
browserslist	15/11/2020 17:13	Archivo	1 KB
changelog.txt	15/11/2020 17:38	Documento de te...	1 KB
debug.log	14/11/2020 19:34	Documento de te...	1 KB
ionic.config.json	31/10/2020 21:25	Archivo de origen ...	1 KB
karma.conf.js	15/10/2020 19:01	Archivo de origen ...	1 KB
package.json	15/11/2020 17:13	Archivo de origen ...	2 KB
package-lock.json	31/10/2020 21:26	Archivo de origen ...	526 KB
tsconfig.app.json	15/10/2020 19:01	Archivo de origen ...	1 KB
tsconfig.json	15/10/2020 19:01	Archivo de origen ...	1 KB
tsconfig.spec.json	15/10/2020 19:01	Archivo de origen ...	1 KB
tslint.json	15/10/2020 19:01	Archivo de origen ...	4 KB

Install the app dependencies and test in browser

Access via your ionic CLI to the installation folder and execute the following command in order to install the necessary plugins and start running the app in your browser:

ionic serve

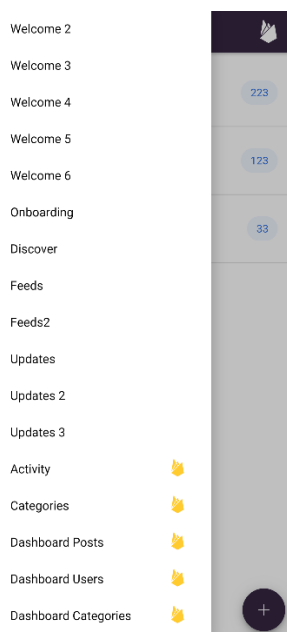

Say yes to "Install @ionic/app-scripts?" question

Fonts

This app starter has three different google fonts:

You can change the current theme font by commenting or uncommenting the proper lines on the following files: "*src/global.scss*"

FAQ

does the theme implement a full backend system?

No, this is a theme, but all the elements are easily configurable via ionic standard components.

do you accept modifications requests?

Yes, we can implement different modifications by requests, please contact to info@ionic4themes.com.
